

Media Panel Frame Extenders

The SOHO Pro Media Panel Frame Extender (Standard Deep) adds an additional 1" of mounting depth to accommodate oversized components inside of our Media Panels (P2100/P3000/P4200).

Whether retrofitting existing Media Panel installations (extender only) or install as new (base/extender/lid), it can be mounted in minutes to increase the internal depth by 1", or stacked for additional depth.

Features & Benefits

- Adds 1" depth to Primex SOHO Pro Media Panels (P2100/P3000/P4200) for oversized components.
- Installs easily between standard frame/lid and base.
- Stackable in 1" increments for scalable expansion.
- Designed to retrofit easily with existing Media Panel installations.
- High quality engineered plastic made in North America for long-lasting component protection.
- UL-listed and industry-standardized for easy implementation.

Dimensions

Fits Primex P2100/P3000/P4200 Media Panel Frames
