

### A Standalone Solution

Free-standing or wall-mount, the versatile Verge PR2300 can be placed virtually anywhere within the premises, bringing fiber to Brownfield quickly and easily.

### Discrete & Elegant

Simple clean lines and subtle curves tame the tangle while blending into the end-users decor.

Free-Standing

### Compact

Holds all the cabling and active (modem, ONT, UPS), and passive (cable management clips/spools, modules) components of a multi-play residence in a 17"W x 23"H x 6.5"D footprint.

### Install Faster

Pre-loading the enclosure allows for more installs per day and faster service rollout, potentially reducing cost.

### Minimize the Mess

Tucking equipment and cabling away, safe and sound and out of sight, makes for happy customers and reduces subscriber loss.

### Welcome Fiber

Today's connected homes are fiber based, and Primex has what you need to move it inside.

## Get into Brownfield

Introducing the first WiFi Transparent, Media Distribution Enclosure specifically designed for retrofit installations.

PR2300

VERGE

### Retrofit-Friendly

Finally, an enclosure that can be tucked under a desk or mounted to a wall without modifying the infrastructure.

### Hey Good Looking!

Discrete and easy on the eyes, the Verge PR2300 is as attractive as it is functional. Smooth styling and ergonomically designed with the installer and end-user in mind.

### WiFi Transparent

Allows wireless signals to pass through more easily than metal enclosures so your customers stay connected and off the tech support line.

Wall-Mount

# Make a stand in Brownfield

Introducing the first, stand-alone media distribution enclosure specifically designed to streamline Brownfield fiber installations.

The Verge PR2300 Media Distribution Enclosure provides a clean, low-profile, easy-to-install central location for bringing smart home multi-play fiber applications into retrofit residential SFU/MDU's.

The patent pending Verge PR2300 allows service providers to quickly roll out fiber to residences in a pre-loadable, virtual plug-and-play unit, cutting installation time while offering a visually appealing finish to the homeowner.

Whether free-standing against a desk or wall-mounted in a closet, the installer-friendly Verge PR2300 with its unique Rail Mounting System is ideal for Brownfield fiber retrofits where no in-wall solution exists.

Now, the efficient cable and component management of the in-wall Verge Media Distribution Enclosure family (P2100, P3000, P4200, P6300) has been brought to retrofit applications with freestanding and surface-mount functionality.

Today's homes are fiber-based, and Primex has what you need to move it inside.

## Protective

Curved top prevents customers from placing spillables on top of enclosure.

## Versatile

An optional back cover allows for completely free-standing applications.

## Plug and Play

Pair the optional keystone adapters and couplers for simple plug and play connectivity.

## Rail Mounting System

Unique Rail Mounting System with adjustable single, double or keyhole brackets allows for fast, simple and flexible component configuration.

The tool-less design allows for easy stacking of non-traditional equipment.

## Easy Access

Lids feature snap-in handles that blend naturally into the design while doubling as side venting. Simple locking mechanism on the handles limits end-user access.

## Passive Venting

Generous venting ensures equipment remains within operating temperature limits.

## Free-Standing

Easily centralize multi-play services anywhere within the premises.

Versatile Installation. Can be mounted on the surface inside a closet or free-standing next to a desk.

## Wall-Mount

Retrofit Brownfield applications quickly and discretely.
