

PR1500 Allfield

The Primex SOHO Pro™ PR1500 Allfield media panel is an all-in-one new build and retrofit WiFi transparent enclosure. It mounts in-wall, on-wall or free standing for single or multi-family applications.

The unique, patent-pending Smart Lid is self-aligning and closing with an adjustable depth and clean aesthetics.

With an internal height of 15", the PR1500 provides ample room for multi-play applications from broadband to smart home installations.

Pair with the range of Primex mounting systems for versatile component placement in almost any application.

Q&A

WHAT IS ALLFIELD?

Allfield describes the dual purpose of the PR1500 in that it installs in both Greenfield (new builds) and Brownfield (retrofits). The PR1500 can be used for both situations with capability for in-wall, on-wall, or freestanding installation.

HOW DOES THE SMART LID WORK?

Primex developed a patent-pending smart lid that self-aligns and closes when placed in close proximity to the base. Without latching, the lid is held firmly in place for easy installation and allows for adjustable depth if more internal space is required. An accessory locking kit is available.

WILL THE 'SMART LID' INTERFERE WITH ELECTRONIC COMPONENTS MOUNTED INSIDE?

No, third party independent testing has determined that there is near-zero chance of electromagnetic interference of any significant amount with internally mounted electronic components.

New construction
(Greenfield) in-wall Installation

Retrofit construction
(Brownfield) on-wall Installation

HOW MANY MODELS ARE THERE?

Two 15" models for now. Greenfield, which converts to Brownfield quickly and easily, and Brownfield which comes ready-made for retrofit wallmount or freestanding installs.

HOW DOES IT CONVERT FROM GREENFIELD TO BROWNFIELD?

Using any simple cutting tool, the tabs on the base and frame of the Greenfield model are trimmed quickly and easily to convert into the Brownfield retrofit model. Visit www.primex.com to see conversion and installation videos.

DOES IT WORK WITH PRIMEX MOUNTING SYSTEMS?

Yes, it works with the Primex Universal, Rail, and Shelf Mounting Systems

WHAT ARE THE LOCKING OPTIONS?

An optional locking kit featuring dual key locks is available for more secure installations.
