

## For SOHO Pro Media Panels

Primex offers two types of secure locking systems for SOHO Pro P2100, P3000, P4200 and PR1500 Media Panels. The Lock Kit provides secure, limited access via either single (P2100) or double (P3000/P4200/PR1500) locks. The hex lock kit requires a 5/8" can wrench for access. Both styles of locks serve to limit end-user access effectively.

### Features & Benefits

- Two styles of locks available (Hex and Key) for different applications
- Key lock provides secure, restricted access to enclosures.
- Hex lock restricts access while allowing standard hex tool to be used
- PR1500 lock kits come with snap in lock comb for variable locking depth to accommodate different drywall and equipment sizes
- Minimal tools required for ease of installation
- Key locks come with 90° and 180° rotation stops

### Dimensions

Size: Fits SOHO Pro Media Panels: P2100, P3000, P4200, PR1500
