

Wave™ Fiber

Connectorized Fiber Terminal (CFT)

Wave Fiber product line offers a versatile and cost-effective solution for residential and multi-use network deployments.

Connectorized Fiber Terminals (CFT) come with pre-terminated fiber assemblies that speed up the installation process. These products are ideal for installation into main equipment rooms, secondary equipment rooms or demarcation locations.

FEATURES & BENEFITS

External mounting brackets allow for quick and easy deployment.

Compact form factor helps to fit the product in space sensitive locations.

Separate the service side and the customer side by utilizing the built-in service separator.

Built using high-quality, UV-protected, engineered plastic, providing long lasting fiber protection in demanding weather conditions as well as within indoor environments.

Offered in a variety of lengths and fiber counts, provides the ideal solution for a range of applications.

Designed and manufactured in North America.

Snap lock lid with additional 216-tool security bolt provides secure access.

Fiber optic cable and connectors meet or exceed GR20 and GR326 respectively.
