

30-inch Next Generation Media Panel

The Primex[®] SOHO Pro+ media panel delivers a modernized, thermally optimized enclosure designed for today's connected homes and next-generation broadband equipment. Its retrofit-ready door and frame, and flexible mounting options provide a clean, future-proof solution for both new construction and existing installations.

Features & Benefits

- Modernized slim door and frame deliver a cleaner, upgraded aesthetic for both new and existing installations.
- Enhanced ventilation and thermal performance help maintain lower equipment temperatures for improved reliability.
- Retrofit-ready design allows direct replacement of existing media panel doors and frames without removing the enclosure.
- Large internal capacity supports active equipment, passive components, and organized cable management.
- Standardized mounting hole pattern ensures compatibility with Primex Shelves and Universal Mounting Systems.
- Multiple top and bottom knockouts enable microduct, fiber, and robust cable routing options.
- Lightweight construction improves handling and speeds up installation for contractors and service technicians.
- Optional keyed or hex locks provide enhanced security for multi-family or restricted-access environments.
- ETL certified to UL 2416 for safety and compliance with modern ICT and AV equipment requirements.
- Future-ready layout accommodates next-generation gateways, ONTs, and Wi-Fi equipment for evolving home connectivity needs.
